## Start Children to School Right

After the vacation rest, school children should quickly settle down to the task of learning. Do your part!

Parental responsibility does not end by sending them to school. The child must be equipped with mind and body at their best.

And here the right food plays a most important part.

Growing children need energy; the right kind and lots of it. And energy comes from well nourished nerves and brain.

## Grape-Nuts

—a food made from wheat and barley, contains the vital mineral salts—Phosphate of Potash, etc. (grown in the grains) which directly act with other food values to build up body, brain and nerves.

Statistics prove that much of the "backwardness" of some children is due to faulty nourishment.

A morning dish of Grape-Nuts and cream is good alike for the bright scholar and the backward pupil. The latter needs the nutrition; the former will progress in sounder physical and mental health because of it.

"There's a Reason" for Grape-Nuts

—sold by Grocers everywhere.
